# **Preface**

This edition of Combined Common Generic Drug Formulary-2025 containing total 4899 drug formulations marks a significant milestone of Medical Store Organization (MSO) in continued endeavour to ensure the delivery of safe, therapeutic & cost effective, evidence-based patient care across all healthcare institutions under the Central Government. This formulary serves as a dynamic and continually updated reference document that compiles a comprehensive list of generic drug formulations recommended for clinical use. It reflects the current collective judgment and consensus of experienced professionals from the fields of medicine, pharmacy, and nursing working in various Central Government Organizations — including CGHS, RML Hospital, VMMC & Safdarjung Hospital, Lady Hardinge Medical College (LHMC), Kalawati Saran Children's Hospital (KSCH), Rural Health Training Centre (RHTC), Central Armed Police Forces (CAPFs), Central Prisons, and other associated healthcare facilities throughout the country.

This revision has been conceptualized and coordinated by the Medical Store Organization (MSO) under the Directorate General of Health Services (Dte.GHS). The updated formulary is the result of a comprehensive, evidence-based review process involving an evaluation of therapeutic efficacy, safety profiles, and cost-effectiveness of available pharmaceutical agents. The review incorporated feedback and demand data from various indenting units, procurement trends, and purchase records from Authorized Local Chemists (ALCs) under the CGHS framework. Each inclusion, modification, or deletion within the formulary has been guided by the core principles of clinical efficacy, patient safety, rational drug use, and economic prudence.

The Combined Formulary of Generic Drugs essentially outlines the medications that have been approved for use within these institutions. It is important to emphasize that the prescribing authority within each healthcare organization to recommend drug formulations from Combined Generic Drug Formulary-2025. However, keeping in view of continuous advancement in prescribing patterns of drug formulations, the institutions are flexible to recommend specific drug formulations based on individual patient requirements, clinical judgment, and institutional availability to include new formulations in the upcoming editions of Combined Generic Drug Formulary.

In this new edition, several important revisions and updates have been introduced. These include:

Addition of new therapeutic agents to address emerging clinical needs and align with current treatment guidelines.

Deletion of banned combinations due to safety concerns.

Revisions to prescribing and dispensing policies, aimed at promoting rational drug utilization and standardizing pharmaceutical care across all participating institutions.

The overarching objective of this revised formulary is to improve patient outcomes, promote consistency in clinical practice, and optimize medication management within government healthcare settings. By ensuring that the most appropriate and cost-effective medicines are available, we aim to enhance the quality and efficiency of healthcare delivery to all beneficiaries. The Medical Store Organization expresses its sincere appreciation to the Formulary Revision Committee, the technical and clinical experts, and all members of the participating institutions and Technical staff of MSO whose dedication, expertise, and collaborative efforts have been instrumental in the successful completion of this revision in time bound manner. Their collective contributions have ensured that this document remains an authoritative and practical guide for healthcare professionals.

We reaffirm our commitment to continuous improvement and encourage all users of this formulary — including physicians, pharmacists, nurses, and administrators — to familiarize themselves with its contents. The formulary should be regarded as a primary reference for clinical decision-making and rational prescribing practices.

We also invite constructive feedback and suggestions from users to help us to refine future editions. Your insights will play a vital role in maintaining the relevance, accuracy, and utility of this essential reference tool in the evolving landscape of healthcare.

Yours Sincerely  
Dr. Anju Nanda,  
DDG (Store)

# **About the Drug Formulary:**

The Highlights of this VMS Common Formulary of Generic drugs containing total 4899 Drug formulations are as under :

- (a) All the drug formulations have been classified in appropriate category as per their therapeutic usage/indications.
- (b) The drug formulations have been arranged in alphabetic order in each category to make it user friendly.
- (c) The nomenclature of categories for classification of drugs have been modified wherever necessary to make it more clear.
- (d) The strength of each drug formulations have also indicated with the composition of drug formulation.
- (e) As far as possible the composition of the drug formulations have been kept in accordance with the product permission issued by Drug Licensing Authority.
- (f) The new seven-character alphanumeric VMS Codes have been assigned to all the drug formulations in VMS Common Formulary of Generic drugs containing total 4899 Drug formulations also indicating their old VMS codes as per VMS drug formulary 2023. The old VMS codes of drug formulations shall be in force till the validity of existing rate contracts of the respective drugs only.
- (g) The users/stakeholders are requested to share the new drugs with MSO(DGHS) which are being used in their department/healthcare facilities but not included in this formulary so that they may be considered for inclusion by the formulary committee in upcoming revisions.
